### Networking Solutions:

We offer network design & implementation services that suit every requirement from small office/home office (SOHO) to larger scale networks supporting hundreds of users.

From cabling and cabinet installation to equipment selection, testing and training we provide all Services. Q8 Infosys utilizes the latest wireless, copper and fiber optic technologies to provide sound structured cabling solutions. We also provide high-tech sound switching and routing technologies that enable Clients to obtain the best performance from their network infrastructure.

Supplying high-end and low-end Servers and Installations, Configuration and testing.

- **Remote Access & Security:**  
Whilst adding to security considerations, the rapid uptake of high speed broadband also opens up a vast array of options, such as remote access, that can be used to change the way in which clients conduct business.

The introduction of low cost/high speed internet technologies enables small to medium sized businesses to expand their business operations by extending the boundaries of their internal networks therefore providing workers, suppliers and customers with secure access to information from anywhere. We can deliver these options to client whilst taking care of any security considerations that need to be addressed.

### Backup & Disaster Recovery:

Q8 Infosys provides comprehensive data backup and recovery solutions. We provide solution as per the clients needs. Supply the necessary equipment, software and support in future. Q8 Infosys provides consultancy for setting up Business Continuity Plan (BCP).

We can ensure that the impact of a critical system failure is minimal by ensuring that client's data is adequately backed up and Disaster Recovery and Business Continuity procedures are in place to minimize downtime.
